INHAMUL HASHAN

Python Developer | Software Developer | Software Engineer

United Arab Emirates , Dubai | +971 54 380 5201 | inhamul07@gmail.com | github.com/inhamulhashan | linkedin.com/in/inhamulhashan

PROFESSIONAL SUMMARY

Computer Science Engineering graduate (2022–2026) with hands-on experience in Python, full-stack web development, and software engineering fundamentals. Demonstrated ability to build data-processing pipelines, REST APIs, and responsive web applications using Python, JavaScript, React.js, and Node.js. Internship-trained in software workflows, technical documentation, and Git-based collaboration. Strong foundation in Data Structures & Algorithms, DBMS, and Operating Systems. Actively seeking a Python Developer, Software Developer, or Software Engineer role to contribute to scalable, production-grade software.

TECHNICAL SKILLS

Languages: Python (primary), JavaScript (ES6+), SQL, Bash (basic)
Web & Frameworks: Flask / REST APIs, Node.js, Express.js, React.js, HTML5, CSS3, Bootstrap
Databases: MySQL, MongoDB, SQLite
Data & ML Basics: Pandas, NumPy, Scikit-learn (basic), Data Analysis, System Monitoring
Tools & Practices: Git, GitHub, VS Code, Postman, Linux (CLI), Agile/Scrum basics, Unit Testing

PROJECTS

Malware Detection System | *Python · Pandas · Scikit-learn · Git* *Jan 2025 – Apr 2025*

- Engineered a Python-based malware detection engine that analyzes file behavior and system-call patterns to flag security threats, achieving over 90% detection accuracy on test datasets.
- Designed and optimized data-processing pipelines using Pandas to clean, normalize, and transform 10,000+ system-log records, reducing false-positive rate by ~15%.
- Led a 3-member team using Git branching workflows; authored architecture diagrams and test-case documentation, ensuring full reproducibility of results.

RESTful Task Management API | *Python · Flask · MySQL · Postman · Git* *Personal Project*

- Built a production-ready REST API with Python/Flask supporting CRUD operations for user tasks, with JWT-based authentication and MySQL persistence.
- Validated all endpoints using Postman; wrote unit tests covering 80%+ of business logic; deployed documentation via Swagger/OpenAPI spec.

EXPERIENCE

Software Engineering Intern | **Femtosoft Technologies** *Aug 2025 – Oct 2025*

- Automated digital record management workflows, cutting manual data-retrieval time by an estimated 30% for the operations team.
- Collaborated with senior engineers on sprint deliverables, consistently meeting deadlines across a 2-month internship cycle.
- Produced and maintained structured technical documentation and project reports, improving cross-team information accuracy.

EDUCATION

B.E. Computer Science Engineering | **Anna University Affiliated College, Tamil Nadu** *2022 – 2026*

Relevant Coursework: Data Structures & Algorithms · DBMS · Operating Systems · Computer Networks · Software Engineering · OOP

CERTIFICATIONS & LEARNING

- Python for Everybody Specialization – Coursera (in progress)
- The Complete Python Bootcamp: From Zero to Hero – Udemy
- React.js & Node.js full-stack development – Udemy (ongoing); portfolio hosted on GitHub
